

Air Quality at Work

INDOOR AIR QUALITY ASSESSMENT AND CONSULTATION

- Physical Parameters
 - Temperature
 - Air Velocity
 - Relative Humidity
- Chemical Parameters
 - Carbon dioxide
 - Carbon monoxide
 - Ozone
 - Formaldehyde
 - Total Volatile Organic Compounds
 - Dust Particle, PM4 and PM2.5
- Microbiological Parameters
 - Total Viable Bacteria Count
 - Total Viable Fungal Count

Why is IAQ Important?

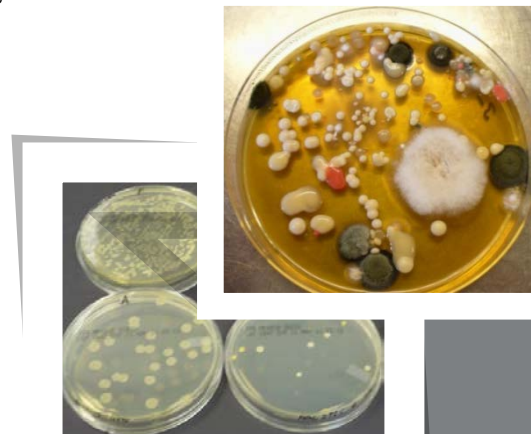

“Poor indoor air quality can cause or contribute to the development of infections, lung cancer and chronic lung diseases such as asthma. In addition, it can cause headaches, dry eyes, nasal congestion, nausea and fatigue.” – American Lung Association

Findings done by William Fisk, Lawrence Berkeley National Laboratory in California:

- Reduce SBS symptoms by 20 to 50%, with estimated savings of \$10 to \$100 billion
- Reduce asthma by 8 to 25%, with estimated savings of \$1 to \$4 billion
- Reduce other respiratory illnesses by 23 to 76%, with estimated savings of \$6 to \$14 billion
- Improve office worker productivity by 0.5 to 5%, with estimated savings of \$20 to \$200 billion

To ensure healthy and safe working environment, to prevent sick building syndrome (SBS) or to meet BCA Greenmark requirement, Nuevo Lab Pte Ltd is able provide IAQ testing to meet your needs.

Nuevo Lab Pte Ltd wants to be part of your team to create a better, healthier environment!
